COMPACT WHEEL LOADER

Operating weight: 4,900 kg
Net Power: 46.2 kW (63 HP)
Bucket capacity: 0.8 – 1.2 m³
Steering: Articulated steering

TL80
The V80 is fitted with various equipment which enable precise, comfortable and productive control of the machine: Smart control, Fingertip control and multi-function joysticks offer optimal handling to the operator for a productive day work.

**EASY TO USE**

For better reliability, for better stability. The wheels forward and backward follow the same way. No damage to the lawns, or pavements. Short turning radius and optimal positioning of pallet forks. Less wear on tires.

**STRAIGHT AND RIGID ARTICULATION**

Improved operator comfort, increased machine stability, longer life. The stability of the machine is optimized when using the bucket and forks.

**REAR OSCILLATING AXLE**

Thanks to its parallel kinematic system, the V80 takes loads quickly and precisely without having to constantly adapt the load angle.

**PARALLEL KINEMATICS**

Absolute Reliability
COMFORTABLE CABIN
Designed to ensure maximum comfort and productivity for the operator. The performance enhancing environment provides a very pleasant working atmosphere. The control system for the machine uses innovative technology. The machine remains easy to handle, even when used in challenging conditions. This helps driver and machine deliver high productivity.

MOTOR
Complies with EU Phase V / EPA Tier 4, guaranteeing reduced fuel consumption and emissions. The cross-mounted motor allows easy access for maintenance and acts as a counterweight.

HYDRAULIC QUICK-HITCH SYSTEM
The quick-hitch system allows the accessories to be easily changed from the cabin with two controls.
ARTICULATED STEERING WITH OSCILLATING REAR AXLE

When used at a densely built-up location or construction sites with limited space, the articulated steering delivers great maneuverability with its 40° steering angle.

The articulated steering also allows the bucket to approach the load in a straight line, even at the maximum steering angle. This affords the operator greater flexibility in terms of picking up pallets or setting down loads. The oscillating rear axle has a wide slewing angle of 10°, keeping all 4 wheels in contact with the ground at all times, even when working on uneven ground. The operator also sits parallel to the work attachment at all times. Only the rear axle oscillates – unlike other manufacturers, where the whole of the rear end oscillates. This means the weight of the machine is always moving in the same direction as the bucket, which in turn increases the pressure on the ground when backing up.

DIMENSIONS

The V80 has very compact dimensions in all aspects: height (<2,7 m), width, length and turning radius. These compact dimensions contribute to the high maneuverability of Yanmar wheel loaders.
HYDRAULIC QUICK HITCH
Replace tools quickly and easily from the cabine using the quick-hitch system thanks to two-handed operation. It is easy and very safe to operate and allows quick and smooth change of attachments.

LIFTING FRAME

PARALLEL KINEMATICS
The parallel kinematics system allows you to lift a load quickly and precisely without constantly having to adjust the loading angle. While the kinematics system take care of the stroke angle, the operator is free to concentrate on where exactly to set down the load. The parallel kinematics system optimise work cycles when loading and unloading the second row on a truck. The clever design ensures the tilt control lever does not collide with the body of the truck.
POWERLINE

ENGINE
The V80 is fitted with a powerful engine which delivers results in terms of operation and environmental protection. Fewer emissions, more power. Engine: EU Stage V, EPA TIER IV. Adopting European and American emission levels ensure a significant reduction in particulate emissions compared with previous levels – from 0.4 to 0.025 g/kWh.

TAKE ADVANTAGE OF THE NEW ENGINE TECHNOLOGY
- Lower fuel consumption really pays off. The machine is delivered with a diesel particulate filter as standard. This saves on servicing costs.
- Fresh air: pollutants in the emissions from the V80 are reduced by up to 90%. Significantly fewer particulate are emitted thanks to the advanced exhaust after-treatment. This is achieved by means of improved combustion and injection systems and a diesel oxidation catalyst (DOC).
- Drive characteristics have been optimised for the new engine to deliver performance and meet regulations.

HYDROSTATIC TRANSMISSION
Hydrostatic high-pressure transmission, maximum productivity thanks to hydrostatic drive technology – smooth power development without interruption of traction.

WORKING HYDRAULIC
The working hydraulic (3rd Section) work completely independently of the hydraulics for transmission. 3rd Section for operation of hydraulic quick coupler and common work tools.
Additional control circuit (4th Section) for operation of special attachments, which requires hydraulic oil flow (optional). The 4th Section is also available with High Flow function (optional).

AUTOMATIC DIFFERENTIAL LOCK
The V80 fits with permanent all-wheel drive and automatic self-locking differentials on the front and rear axles (35% locking effect). Both provide enhanced traction when traveling in a straight line and turning corners – perfect for bucket loading.

TRAVEL RIDE CONTROL*
The travel ride control function induces a suspension effect in the boom cylinder thanks to an accumulator. This system improves the drivability of the loader when transporting loads on uneven ground or driving at high travel speed. This feature improves drastically the operator comfort.
*Option for V80

TRACTIVE FORCE
The hydrostatic transmission is characterized by its high power and smooth adjustment. This results for the operator in high rim pull for effective pushing or digging and good travel performance even on steep inclines.
SMART CONTROL

Smart Control is the Yanmar operating system for compact wheel loaders. It has never been easier to match a construction machine precisely to the driver and application. Numerous controls have also been redesigned and rearranged for quicker operation and improved machine monitoring. The 3.5” display shows machinery and engine data. The modern menu guide is similar to current smartphones. The windscren, which domes inwards, minimizes the mirror effect.

What this means for you:
- Intuitive operation that is easy to set for each individual driver
- 3rd & 4th electric proportional hydraulic control circuit for operating work attachments
- New display design to enable easy machine monitoring
- Keypad with extra-large keys for easy operation

INSTRUMENTATION

An additional Keypad allows quick adjustment of a main installation.

ADJUSTABLE STEERING COLUMN

The adjustable steering column is part of the standard equipment of the machine. It improves the operator comfort and makes it easier to enter and exit the cabin from both sides.
OPERATOR STATION

Designed with driver comfort and productivity in mind, the cabin features noise and vibration damping and is ROPS/FOPS-approved.

ALL-AROUND VISIBILITY
Visibility is optimized through big windows. The optimal visibility leads to greater safety on jobsites. Front visibility is optimum on the attachment for faster and safer operation.

SECOND DOOR
- Optimal cabin ventilation
- Communication possible on both sides
- Cab easy to clean
- Improved visibility, even at ground level

COMFORTABLE & ADJUSTABLE SEAT
Our standard seat with hydraulic suspension, adjustable in position and weight, makes it more comfortable for the driver.

PRECISE FINGERTIP CONTROL
The fingertip control allows the operator to regulate the oil flow with real precision, all the way from « zero » to « full ». The electrical proportional activation of hydraulic functions is simple thanks to a thumbwheel on the joystick. A lot of attention has been paid to an outstanding ergonomics to improve operator comfort.
PERFORMANCE

TRAVEL SPEED
Operating in a closed circuit, the hydrostatic travel drive delivers lots of power while keeping fuel consumption low. The V80 loader can achieve up to 20km/h on the road. As an option, the V80 is also available in high speed version with a speed from 0 to 36km/h.

BRAKE INCHING PEDAL
By using the inch brake pedal, fine-tuning of the hydraulic performance is possible. The driver can modify the power between the drive and the working hydraulics. It allows to slow down the loader while keeping the engine rpm up. This feature improves the cycle time of digging and loading operations. This inch brake pedal prevents wheel spin and avoids excessive wear of the tires.
The large opening offered by the engine hood allows an easy access to all main service items, for an easy and fast maintenance. This contributes to reduce the TCO of the machine. Daily tasks can be performed from ground level to save time.

**MAINTENANCE**

**BATTERY MAIN SWITCH**
Can be accessed when standing next to the cab.

**SEPARATE BATTERY POLES**
Option: separate battery poles for easy restart thanks to free access under the engine hood.

**CAB CABLING**
Simple disconnection of electrical lines when dismantling the cab.
TAILORED FOR YOUR JOB

In order to provide a wheel loader adapted for the job, Yanmar offers numerous equipment packages and additional equipment. Using equipment tailored to the job helps increase productivity, reduce wear and damage.

**PROTECTION PACKAGE FOR HARSH ENVIRONMENTS**
- Special coating
- Piston rods for lift, tilt, and steering cylinders with chrome/nickel coating (instead of the standard chrome coating)

**LIFTING ARM**
- Derating dump speed valves

**HYDRAULICS**
- Fourth hydraulic control circuit
- Biodegradable hydraulic oil
- Pressure relief valve
- Hydraulic shock absorbers

**ROAD PERMISSION**
The V80 may be driven on the road and can be used with an optional towing hitch as a tractor unit.

**CAB**
- FOPS modification kit (protection against falling objects)
- Heated external mirror
- Supplementary diesel heating (independent of engine) with circulation system
- Sliding window on right-hand side
- Air conditioning
- LED working lights rear
- USB charger

**MAINTENANCE**
- Central lubrication
- Electric refueling pump

**OPERATION**
- Reverse signal
- Electronic immobiliser
- Creeper gear

SPECIFICATIONS

UNDERCARRIAGE AND TIRES

Front : rigid planetary final drive axle, centre-mounted disc brake. Limits slip-type differential 35%.

Rear : oscillating planetary final drive axle, with integrated reduction gear, oscillation locking with slewed undercarriage. Limited slip-type differential 35%.

Angle of oscillation ± 10°.

Service brake hydraulically actuated centre-mounted disc brake, acting in all 4 wheels via 4-wheel drive.

Auxiliary brake hydrostatic through closed-circuit travel drive.

Parking brake mechanically actuated centre-mounted disc brake on front axle.

Tires 405/70 R 18 SPT9 Dunlop.

SAFETY

Steering system : articulated steering, fully hydraulic, 1 steering cylinder with final positioning damping on both sides, oil supply via load-sensing priority valve, quick and easy steering even at engine idle-running speed.

Total steering angle | 80°

Driver’s seat MSG85 with hydraulic suspension, weight adjustable, longitudinal and height adjustment and lap belt in compliance with ISO 7096 & ISO 6683.

Rear-view mirrors foldable.

Self-lock differential 35% in front and rear axle.

Inch brake pedal.

VIBRATION VALUES IN COMPLIANCE WITH DIRECTIVE 98/37/EEC & EN474

Effective values of acceleration below for entire body | 0.5 m/s²

And for upper limbs | 2.5 m/s²

MISCELLANEOUS

Multifunktions display / Smart Control : the driver can adjust the machine exactly to the environment, operation, and individual specific requirements.
SPECIFICATIONS

OPTIONAL EQUIPMENT

ENGINE
Diesel engine with diesel particulate filter (DPF) | High-speed version 36 km/h | Manual throttle for engine rpm with shutdown hydrostatic transmission.

HYDRAULIC SYSTEM
4th control circuit and installation on lift frame, incl. couplings and continuous operation e. g. for attachments with 2 hydr. functions | Hydraulic outlet for front hand-held hammer, with flow divider | Open return, on lift frame | Pressure relief valve.

CABINE
FOPS skylight guard | Yellow beacon | Right-hand door with sliding window | Radio installation kit | Working floodlight | LED working lights rear | USB charger.

CHASSIS AND TIRES
405/70 R 18 EM 01 Mitas | 340/80 R18 TRI2 Nokian | 340/80 R 20 XMCL Michelin | 335/80 R 20 MPT E-70 Conti | 400/70 R 20 IT520 Goodyear | 405/70 R 20 SPT9 Dunlop | 405/70 R 20 EM01 Mitas | 500/45-20 J331 Alliance | Non-standard tires available on request.

SAFETY
Bucket & loader arm cylinder safety block valve | Descent regulation valve.

COUPLERS
Ball head coupler | Rockinger trailer coupling.

MISCELLANEOUS
Central lubrication unit | Special paint | Bio oil | Anti-theft device (immobiliser) | Electrical tank refilling pump | Rear axle weights, approx. 270 kg | Quick couplers (flat face) for 3rd control circuit on lift frame | Back-up alarm for reverse travel | Acceptance as agricultural or forestry tractor | Further optional equipment available on request.
